

## Sign Configuration Profile

Apple will verify that the profile was generated by NextDNS. Signed profiles cannot be manually edited.

Download

### Install on iOS and iPadOS

1. Open the Settings app.
2. Tap Profile Downloaded.
3. Tap Install in the upper-right corner, then follow the onscreen instructions.

### Install on macOS

1. Open the downloaded .mobileconfig file.
2. Open System Preferences.
3. Go to Profiles.
4. Click Install.

### Install on tvOS

1. Open the Settings app.
2. Go to General → Privacy.
3. Hover over Share Apple TV Analytics without pressing.
4. Press Play on the remote.
5. Select Add Profile.
6. Make the downloaded .mobileconfig file accessible publicly and enter its URL (or use <https://tinyurl.com/yaa4jsla>).
7. Install the profile following the onscreen instructions.
